PROFESSIONAL SUMMARY

Computer Engineering student pursuing B.Tech with hands-on experience in Python, software development, databases, AI, and full-stack project development. Built practical applications across voting, rental, retail, agriculture, climate-risk prediction, and recycling domains. Strong interest in Python and software development, with experience taking projects from concept and data sourcing through implementation and deployment. Seeking an internship to apply technical skills and gain industry experience.

EDUCATION

Jagdamba College of Engineering and Technology, Yavatmal

B.Tech – Computer Engineering | 2024–2028 | 3rd Year, 5th Semester | CGPA: 7.9 (2nd Year)

Rural Institute, Amravati

HSC | 12th Percentage: 60.33%

Shri Ganeshdas Rathi Vidyalaya, Amravati

SSC | 10th Percentage: 73.60%

TECHNICAL SKILLS

Programming: Python, C, C++, Java

Web Technologies: HTML, CSS, JavaScript, React

Database: MySQL

Frameworks / AI: FastAPI, TensorFlow

Tools / Platforms: Git, GitHub, VS Code, Mapbox

PROJECTS

1. Voting Portal | 2025

- Developed a web-based voting portal to digitize and simplify the student voting process.
- Implemented user and administrator functionality for managing voting, vote records, and results.
- Designed a simple, user-friendly interface while applying practical database concepts.

2. Rentogo | 2026

- Developed a rental platform for discovering homes and rooms available for rent.
- Created structured property listings with interfaces for browsing and viewing property details.
- Focused on a practical, user-friendly solution for simplifying rental discovery.

3. Smart Store Management System | 2026

- Developed a store management application for organizing products, inventory, and customer records.
- Applied database concepts to store, retrieve, and manage store information efficiently.
- Built the system to demonstrate practical software and database management skills.

4. AI Climate Twin India — Climate Risk Prediction Platform | 2026

- Built a full-stack platform predicting rainfall, heatwave, and flood risk using IMD, NASA POWER, ERA5, and ISRO datasets.
- Implemented TensorFlow prediction models with a FastAPI backend and React frontend.
- Used Mapbox for interactive geospatial visualization and owned the project from data sourcing to deployment.

5. KrushiScan | 2026

- Developed an agriculture-focused digital platform providing crop information and farming guidance.
- Included market information and important alerts through a simple, accessible user interface.
- Focused on improving digital access to useful agricultural information for farmers.

6. Kabadiwala Connect (SIH26229) | 2026

- Developed a formal–informal recycling chain platform connecting households, waste collectors, and authorized recyclers.
- Designed a pickup marketplace with transparent pricing, digital payments, collector identity, and traceability.
- Prepared a 6-slide solution pitch deck for the Smart India Hackathon 2026 Software Edition evaluation round.

CERTIFICATIONS & PROGRAMS

- IBM SkillsBuild — Technical Certification
- ISRO — Space Technology Program
- OpenAI — AI Development Certification
- TCS — Professional Certification
- Deloitte — Career Readiness Program
- Google Ads — Platform Certification
- AI Bootcamp — Applied AI Certification
- Multiple Hackathon & Entrepreneurship Program Certificates — 15+ total

CAREER INTERESTS

Python Development | Software Development | Web Development | Full-Stack Development

ADDITIONAL INFORMATION

Internship Availability: Open to paid or unpaid opportunities | **Work Preference:** Remote or Offline | **Duration:** Flexible (1–6 months)
